Objective and Investment Policy

The Lyxor MSCI World UCITS ETF - Monthly Hedged to USD - Dist is a UCITS compliant exchange traded fund that aims to track the benchmark index MSCI World Net Total Return USD Index, offsetting the impact of monthly variations of the index local currency vs. the USD. The USD-hedged share class offers the simplicity of a monthly currency hedge mechanism that is embedded in the investment product, representing an efficient solution to manage the foreign-exchange risk.

Amundi ETFs are efficient investment vehicles listed on exchange that offer transparent, liquid and low-cost exposure to the underlying benchmarkindex.

* Source : Amundi. The above cover complete periods of 12 months for each calendar year. **Past performance is no predictor of current and future results and does not guarantee future yield** . Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.
